- 3 Solution proposée

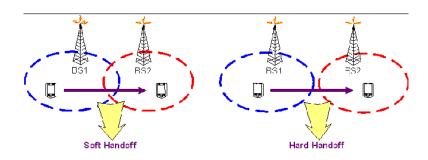

Contexte globale et problématiques

Prérequis et Notions fondamentaux : Handoff, Vertical Handoff et Horizontal Handoff

Prérequis et Notions fondamentaux : Soft Handoff et Hard Handoff

Prérequis et Notions fondamentaux : Les critères du décision de Vertical Handoff

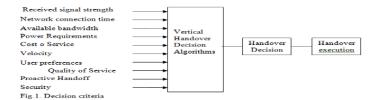

Fig. 1. Decision criteria

√ Recieved signal strength

Prérequis et Notions fondamentaux : Les critères du décision de Vertical Handoff

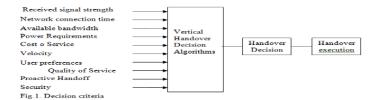

Fig. 1. Decision criteria

- √ Recieved signal strength
 √ Availble handwidth

Prérequis et Notions fondamentaux : Les critères du décision de Vertical Handoff

Stratégies et Fonctions de décisions Vertical Handoff :

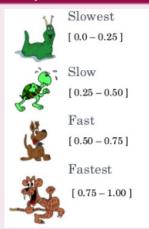

¶ Functions based on Genetic Algorithms

Functions based on Genetic Algorithms :

Représentation Fuzzy Logic : Fuzzy sets

- Functions based on Genetic Algorithms
- ② Strategies based on decision functions (DF) (Cost, Security, Bandwidth, Power Consumption)

- Functions based on Genetic Algorithms
- Strategies based on decision functions (DF) (Cost, Security, Bandwidth, Power Consumption)
- 3 Strategies focused on signal strength (RSS)

- Functions based on Genetic Algorithms
- Strategies based on decision functions (DF) (Cost, Security, Bandwidth, Power Consumption)
- 3 Strategies focused on signal strength (RSS)
- User-centered decisional strategies (UC) (User Preferences, Qos)

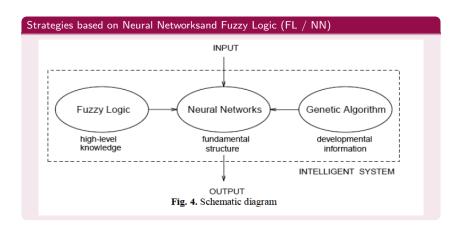

- Functions based on Genetic Algorithms
- Strategies based on decision functions (DF) (Cost, Security, Bandwidth, Power Consumption)
- 3 Strategies focused on signal strength (RSS)
- User-centered decisional strategies (UC) (User Preferences, Qos)
- Oecision strategies with multiple attributes (Multiple Attribute Decision Making)

- Functions based on Genetic Algorithms
- Strategies based on decision functions (DF) (Cost, Security, Bandwidth, Power Consumption)
- 3 Strategies focused on signal strength (RSS)
- User-centered decisional strategies (UC) (User Preferences, Qos)
- Oecision strategies with multiple attributes (Multiple Attribute Decision Making)
- Strategies based on Neural Networksand Fuzzy Logic (FL / NN)
- O Context-aware strategies (CA)

Context-aware strategies (CA)

Table 1. Background model for this algorithm

Context Type	Terminal Side	Network Side
Static	Device capabilities, service types, QoS requirements of services, user preferences	Provider's profile
Dynamic	Running application type, reachable access points	Current QoS parameters of AP

IEEE 802.21 Standard : Avantages et Limites

Avantages:

IEEE 802.21 Standard : Avantages et Limites

Avantages:

√ The service Media Independent Event Services (Mies)

IEEE 802.21 Standard : Avantages et Limites

Avantages:

- √ The service Media Independent Event Services (Mies)
- √The service Media Independent Com-mand Service (MICS)

IEEE 802.21 Standard : Avantages et Limites

Avantages:

- √ The service Media Independent Event Services (Mies)
- √ The service Media Independent Com-mand Service (MICS)
- \checkmark The service Media Independent Information Service (MIIS)

IEEE 802.21 Standard : Avantages et Limites

Limites:

√ Fournit seulement les fondamentaux de base du processus Vertical Handoff.

IEEE 802.21 Standard : Avantages et Limites

Limites:

- √ Fournit seulement les fondamentaux de base du processus Vertical Handoff.
- √ La sélection du réseau approprié selon des métriques ne figure pas.
